

Cat6 High Grade – Flush Moulded UTP 24Awg PVC RJ45 Patch Leads

'our most popular selling product range'

THE DATA CENTRE DIFFERENCE

Category 6 UL Certified 100% copper patch lead with a PVC outer sheath (jacket) and twisted stranded cores, providing a highly flexible cable for a wide variety of RJ45 installations. Its injection flush moulded low profile boot with strain relief, makes it an ideal cable for all Gigabit patching from the network core and out to the edge. The 24Awg High Grade construction provides an extremely robust and versatile product for use across an array of IT technologies including Power Over Ethernet Switching, WiFi AP's, CCTV and Server/PC hardware.

Immediate FOC Economy delivery from local UK stock. An extremely popular choice with both Private and Public Sector clients throughout the length and breadth of the United Kingdom. Supplied in packs of 10 (up to 10 Metre lengths) for easy storage and all clearly labelled with the product length on the outer packaging. Our latest discounted quantity breaks for bulk purchases of this product range are available online.

Available in 18x different lengths and up to 10x colours – providing 158 combinations!
